

OUR MISSION

To generate Power for a Sustainable Life.

OUR VISION

To be one of the leading brands in the world that produces industrial motor and motor application solutions.

OUR POLICY ON QUALITY, ENVIRONMENT AND OCCUPATIONAL HEALTH AND SAFETY INTEGRATED MANAGEMENT SYSTEM

Caring for people, society and the environment,

Providing **diverse, high quality, environmentally conscious and environmentally friendly products and services to the whole society together with our customers** in agricultural mechanization, power products and all sectors in which we operate,

Reducing environmental pollution throughout the life cycle that may arise from production and service activities, aiming at **economical and efficient use of energy and natural resources,**

Protecting the health of employees by making the working environment safe, ensuring that **it determines the risks and hazards** that may arise in order to increase the safety of the enterprise and **it minimizes the risks and hazards,**

In line with our total quality studies, by using all our management systems effectively and continuously improving them, responding to the needs and expectations of the relevant parties, ensuring customer satisfaction, preventing pollution and the effects of environmental dimensions, reducing occupational health and safety hazards and risks,

In constant cooperation and communication with customers, all employees, suppliers, subcontractors, visitors, the community and all other relevant parties,

Organizing training, social events and activities that **promote the protection of the environment and human health,** raising **awareness and sensitivity to environmental, occupational health and product safety, consulting and participating with employees / employee representatives** in the development, planning, implementation, performance assessment and improvement activities of the system,

Aiming at continuous improvement by performing quality, environment, occupational health and safety performance assessments and necessary measurements and analyzes,

Ensuring that products and services comply **with customer expectations** in terms of quality, price and deadline, **all legal regulations** regarding products, services, environment and OHS, and **all compliance obligation requirements,**

Being effective in the market by providing **increased efficiency and rational**

dynamism with a process approach perspective and risk-based thinking,

Remaining as a **strong and profitable company** in variable conditions,

In order to be a reliable company, we, as all employees of Anadolu Motor Üretim ve Pazarlama A.Ş., especially our Senior Management, with the awareness of our social and environmental responsibilities, in all our activities; We undertake that we will be sensitive to the issues of Product, Service, Environment, Occupational Health and Safety, that we will prevent environmental pollution, work accidents, injuries and health deterioration by adhering to the provisions of legal and other conditions, that we will provide products and services to our customers regularly and continuously, that our management systems will be carried out within the framework of these policies that are suitable for our purpose and context and support our strategic direction.
